DYNAMIC MARKET MODELING WITH HETEROGENEOUS AGENTS: APPLICATIONS IN DIVERSE MARKETS*

Hidayet BEYHAN Ph. D.

artikel akademi

This book is derived from a PhD dissertation.

TABLE OF CONTENTS

FOREWORD 13
ABBREVIATIONS 15
SYMBOLS 17
INTRODUCTION 19

1.LITERATURE REVIEW 23
1.1. Agent-Based Models 23
1.2. Agent-Based Model for Financial Markets 24
1.2.1. Design issues 25
1.3. Agent-Based Stock Market Models 25
1.4. Modelling Limit Order Book 29
1.4.1. Perfect rationality approaches 30
1.4.2. Zero intelligence approaches 31
1.4.3. Agent-Based Models for Limit Order Book 32
1.4.4. Interactive Agent-Based Simulators for Limit Order Book 33

2. AN AGENT BASED MODEL FOR STOCK MARKET 35
2.1. Market Mechanism 36
2.2. Traders 38
2.2.1. Noise Traders 39
2.2.2. RSI Traders 39
2.2.3. MACD Traders 40
2.2.4. Bollinger Bands Traders 41
2.2.5. ARIMA Traders 41
2.2.6. LSTM Traders 42
2.3. Market Initialisation 43
2.4. Empirical Findings 46
2.4.1. Price, return and volume analysis 48
2.4.2. Validation 50

2.4.3. Wealth analysis 53

3. AN INTERACTIVE AGENT-BASED LIMIT ORDER BOOK SIMULATOR 57
3.1. Limit Order Books 57
3.1.1. Building a LOB with orders 60
3.2. Limit Order Book Simulator 61
3.2.1. Simulator architecture 61

4. EXPERIMENTS FOR SIMULATED INTRADAY STOCK MARKET 75
4.1. Exploring Price Impact and Bid-Ask Spread 75
4.2. Intraday Trading Performance of Agents 89

CONCLUSIONS AND RECOMMENDATIONS 95
REFERENCES 98

LIST OF TABLES

Table 3.1: Market initial parameters 45
Table 3.2: Agent initial parameters. There cutt-off strategies that agents use to trade are based on agent initial parameters..... 46
Table 3.3: Agent price forecast window and cut-off strategies..... 48
Table 3.4: Asset price and return related descriptive statistics 50
Table 3.5: List of stylised facts for asset returns that is used for simulation model validations. 53
Table 3.6: Average number of long and short positions over the trading period 54
Table 4.1: The limit order book snapshot before and after an order execution. A trader posts a sell order of x=(383.63,120,t_1). Left panel: the state of the limit order book for the stock at time t1. Right panel: the state of the limit order book for the stock at time t_2. .. 60
Table 4.2: A snapshot from the limit order book for the best 10 price level66
Table 4.3: Variable explanation of LOBSTER order file. 67
Table 4.4: Attributes of an agent trade on the exchange. 69
Table 4.5: The featurfes available to each agent trade on exchange..... 72
Table 5.1: ADBE Stock order arrival types for October 2022. 76
Table 5.2: The descriptive statistics comparison of real and simulated market..... 79
Table 5.3: The snapshot of the limit order book for ADBE stock at a selected time 80
Table 5.4: The comparison of absolute price impact for different order sizes for simulated market ADBE. 82
Table 5.5: Descriptive statistics for simulated market stock prices 84
Table 5.6: The price impact mean, standard deviation and relative price impact..... 84
Table 5.7: Traded volume and relative price impact for each simulated stock. 85
Table 5.8: Descriptive statistics for simulated market bid-ask spread..... 86
Table 5.9: Descriptive statistics for agents's intraday total wealth in cash. 93

LIST OF FIGURES

Figure 3.1: LSTM neural network (LeCun et al., 2015).....43

Figure 3.2: The stock market simulation trading periods. The first year of simulation time is initialization period where only noise traders post orders to create a historic data for other agents. The second year is training year for all agents and the following 18 years are trade period for all agents 44

Figure 3.3: Stock Market Simulation Loop Structure.....47

Figure 3.4: Asset price formation at t=600-time step. Agents post buy and sell orders at each time steps of simulated market. All orders are collected and an aggregate supply and demand cuves are given as blue and red lines, respectively. The next step stock price is intercept of these two curve. 49

Figure 3.5: Market outputs over simulation time. Upper left panel: Asset price. The period till solid line is price initialisation whereas the period between solid and dashed line is intelligent agents learning period, and it is trading period beyond the dashed line. Upper right panel: asset price log return. Lower left panel: asset price log return density distribution. Lower right panel : traded volume. 49

Figure 3.6: Return related autocorrelations. Upper left panel: Asset log return autocorrelation function. Upper right panel: Asset log return partial autocorrelation function. Lower left panel: asset price absolute log return. Lower right panel : Asset squared log return. 51

Figure 3.7: Aggregational Gaussianity of returns for daily and weekly returns. . 52

Figure 3.8: Average wealth of agent types
in cash throughout trading period. 54

Figure 3.9: A boxplot for wealth comparison of different agent groups.55
Figure 3.10: Gini coefficient of agent groups
for total wealth at the final step of the simulation. 56

Figure 4.1: A schema for limit order book.....59
Figure 4.2: Limit Order Book simulator architecture. 62
Figure 4.3: Simulation Kernel Flow 63
Figure 4.4: Exchange structure with a visualized flow 65

Figure 5.1: Share of event types for ADBE Stock on 21 October 202277
Figure 5.2: The ADBE stock price of executed visible orders
on 21 October 2022. 78
Figure 5.3: The ADBE simulated the stock price of executed
orders on 21 October 2022. 78
Figure 5.4: Limit order book state for best four bid-ask prices 81
Figure 5.5: The price impact of Random Agent. Upper panel: price impacts where fixed order size is 1. Lower panel: price impacts where the fixed order size is 10.....81
Figure 5.6: The comparison of absolute price impact for order size one and order size ten for simulated market ADBE. 83
Figure 5.7: Price Impact over Market Cap by Traded Volume. The size of bubbles represents the magnitude of overall agent price impact. 85
Figure 5.8: Bid-Ask Spread over Market Cap by Traded Volume. The size of bubbles represents the magnitude of average bid-ask spread.86
Figure 5.9: The intraday bid-ask spread over trade hours for each stock. Upper left panel: TSLA. Upper right panel: ADBE. Lower left panel: PAYX. Lower right panel: GTLB.....87
Figure 5.10: Simulated GTLB midprice versus bid-ask spread.....88
Figure 5.11: Scatter plot for simulated
GTLB midprice versus bid-ask spread 88
Figure 5.12: Bid-Ask Spread and Relative Spread over Market Cap. The size of bubbles represents the magnitude of stock market caps.....89

Figure 5.13: Buy and Moment of Agents for ADBE stock. Red dots are sell moments and green dots are buy moments.....91

Figure 5.14: The intraday total wealths over four stocks. Upper left panel: Agents final wealts and mean wealths for TSLA stock. Upper right panel: Agents final wealts and mean wealths for ADBE. Lower left panel: Agents final wealts and mean wealths for PAYX. Lower right panel: Agents final wealts and mean wealths for GTLB. The orange bars represents the average value of all measured wealth in the day. The blue bars represents the final value of all measured wealth in the day.....92

Figure 5.15: The intraday mean and standard deviation of historical balances. 94

FOREWORD

Despite facing many obstacles and difficulties, I would like to begin by expressing my gratitude to my advisor, Prof. Dr. Burç Ülengin, whose unwavering support made every challenge enjoyable. It was a great opportunity for me to know and work with him.

Furthermore, I am thankful to the members of my thesis progress committee, Assoc. Prof. Dr. Cumhur Ekinci and Prof. Dr. Fuat Beyazıt, for their comments and solutions at different stages of my thesis. I am grateful for their support.

I also want to thank my advisor, Prof. Dr. Rahul Savani, during my research visit at the University of Liverpool. It was a pleasure for me to meet and work with him.

I would also like to express my gratitude to the institutions that supported me during this journey. I was supported by The Scientific and Technological Research Council of Turkey, 2214/A Program, during my research visit at the University of Liverpool.

I would also like to thank all my loved ones and friends who have been with me on this journey.

Lastly, I want to thank my family; my mother, father, and siblings. They supported me patiently and always prioritized my education. From an early age, they allowed me to make my own decisions and always believed in me. I am grateful for everything they have done.
